Summary

Software Engineer with experience developing enterprise web and mobile applications. Skilled in building responsive user interfaces, modernizing legacy systems, and delivering full-stack solutions using C#, .NET, Blazor, React, and TypeScript. Enjoy turning ideas into reliable, user-focused applications while writing clean, maintainable code.

Education

Holberton Coding School, Bootcamp in Full-Stack Software Engineering – San Juan, PR Jan 2022

Atlantic University, B.S. in Art and Design of Video Games – Güaynabo, PR 2018 – 2021

Experience

Software Developer III, TrueNorth Corporation – San Juan, PR Apr 2025 – present

- Develop and maintain enterprise web and mobile applications for Puerto Rico Aqueduct and Sewer Authority (AAA) using C#, .NET MAUI, Blazor, ASP.NET Web Forms, and SQL Server.
- Sole developer modernizing a legacy Xamarin.Forms mobile application through an ongoing migration to .NET MAUI (.NET 10), implementing frontend and backend features using Material Design 3.
- Implemented end-to-end geofencing functionality using SQL Server Geography and OpenLayers.Blazor, designing the spatial data model, consuming coordinate data, and rendering interactive geofences within a real-time technician tracking application.
- Developed a dynamic dashboard legend that updates technician and regional operational metrics based on user selection and live application data.
- Developed custom PDF rendering solutions for legacy ASP.NET Web Forms applications.
- Enhanced legacy ASP.NET Web Forms applications by implementing new features, UI improvements, and bug fixes for enterprise users.

Junior Software Developer, Coqui Health – San Juan, PR Jan 2024 – June 2024

- Developed responsive user interfaces using React and TypeScript for healthcare web applications.
- Implemented UI enhancements, bug fixes, and new frontend features while maintaining a consistent user experience.
- Implemented internationalization (i18n) to support multilingual user interfaces.
- Developed component and end-to-end tests using Cypress and Playwright to improve application reliability.

Software Developer I, Wovenware Feb 2023 – Dec 2023

- Developed and maintained a Java Spring Boot intermediary API supporting a satellite imagery e-commerce platform.
- Implemented backend enhancements and bug fixes for pricing and billing workflows integrated with Vertex and Recurly.
- Implemented AWS Secrets Manager to replace hardcoded application secrets, improving security and credential management.

Skills

Languages: C#, TypeScript, JavaScript, Java, SQL, HTML5, CSS3

Frontend: Svelte, React, Blazor, .NET MAUI, Xamarin.Forms, ASP.NET Web Forms, MudBlazor

Backend: ASP.NET, Node.js, Spring Boot, REST APIs

Databases: SQL Server, PostgreSQL, SQLite

Testing: Playwright, Cypress, JUnit

Tools: Git, Docker, GitHub, GitLab, Jira, Swagger, Figma, Azure Devops, Postman

Languages

Spanish — Native

English — Professional Working Proficiency
